

Surf Design T-Shirt

Term 2 in Design Technology will cover many aspects of design, as a class we will focus on 3D drawing techniques, logo design, positive and negative printed images, heat press printing, photoshop CAD design and producing a final outcome.

You will learn how to create your own t-shirt. We will start by creating a design, adapting it for the market then using CAD.

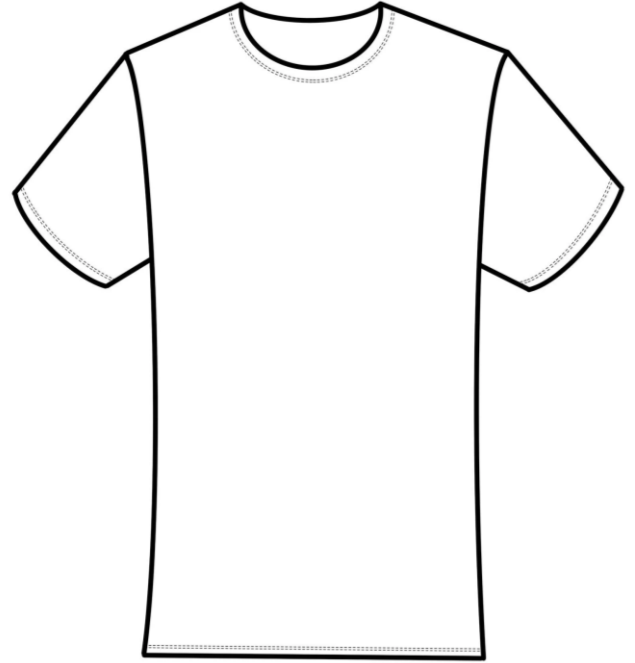

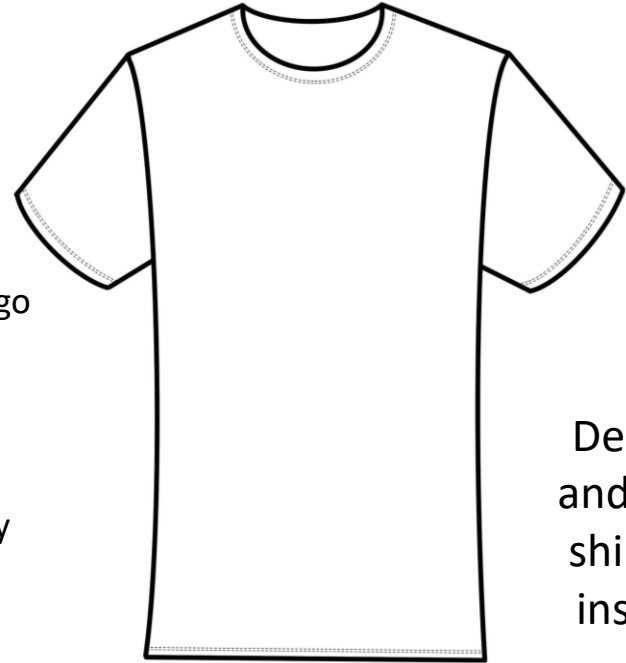

Keywords that you should become competent with:

CAD(Computer Aided Design): --

Heat Press:

Tasks:

- Use the lines above to explain what CAD and Heat press mean. Describe each process.
- Explain what target audience mean:

Task:
Design the front and back of the t-shirt using a surf inspired design.
